The sea turtle is in danger of extinction
Just be humane

Sea turtles have been swimming in the world's seas and oceans for more than 100 million years. However, these organisms are threatened with extinction today. And fall on the red list of endangered animals to a severe degree. We want to protect sea turtles, they play important roles in the marine ecosystem. Among the reasons for making it endangered are: bycatch, the development of beaches, and the dumping of plastic cans and waste in the ocean.
